

EXP NO 4: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR CAR BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM: To Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

step1: Go to zoho.com.

step 2: Log into zoho.com.

step 3: Select one application step.

step4: Enter application name as Car Booking Reservation System.

step 5: Created a new application as a Car Booking Reservation System.

step 6: Select one form step 7: The software has been created.

SAMPLE OUTPUT (Without data)

The screenshot displays the Zoho Creator interface for a SaaS application named 'Car Booking Reservation System'. The left sidebar shows a navigation menu with 'Customer Registrations' expanded, containing 'Customer Registration Form' (highlighted in blue) and 'All Customer Registrations'. The main area shows the 'Customer Registration Form' with the following fields:

- Customer Name: A text input field.
- Phone Number: A field with a country code dropdown (set to +91) and a text input containing '81234 56789'.
- Address: A section with two text input fields labeled 'Address Line 1' and 'Address Line 2'.
- City / District: A text input field.
- State / Province: A text input field.
- Postal Code: A text input field.
- Country: A dropdown menu currently showing '-Select-'.
- Consent: Three radio button options: 'I agree to terms & conditions', 'I will not agree the conditions', and '-'. The first option is selected.
- Email: A text input field.

The bottom of the interface shows a user profile for 'polisettytejasri...' and standard mobile app navigation icons.
